Subject: Microsoft Settlement

Microsoft is a company who is doing business and has people's trust. Making Microsoft uglier and pay to competitor will not save the economy that has been not good for two years. Should dotcoms or any "bubble" company sue Microsoft for their lose since anybody was/is using computer software? Many bad news from big companies have already been damaged people's confident about the economy. Get the Microsoft case to be settled as soon as possible. We need go on.
